

Expanded Traveller Tech Level Table

An odd Traveller item has been moved one place, such as grav vehicles. Medical entries taken from MGT, MongT and White Dwarf #52. Movie analogs often don't include grav vehicles or jump technology at all, consider these on/off innovations coming in at TL 10 or not at all.

TL	Medicine	Other	Movie/Game Analogs
8	organ transplants	optical computing, stunners, rotating spacestations, particle weapons	Outland, Max Headroom (the movie)
9	bionics, low-berth (stasis)	fusion power, perfect speech emulation, laser weapons, railguns, heuristic 'learning' computers	Moon (with clones), 2010 (with AI)
10	regeneration therapy, tissue engineered transplants	grav vehicles (<i>moved from TL 8</i>), crystaliron, solar vaporators, grav repulsors (deflectors)	Aliens (with thinking robots)
11	brain transplants, augmented body parts, robots (drones), sim-stim (slinks/micros)	combat armour, meson guns	GURPS Autoduel (with brain taping and cloning)
12	wafer/skill jacks, medical scanner, brain-tanks	O'Neill cylinders, language translation software, portable plasma gunb, nuclear dampers,	2300AD, Cyberpunk 2020 (with AI and neural interface)
13	cloning, gene-fixing, thinking robots (droids), low sapient AI	fusion still, holographic crystal storage, battledress, holovision (Tri-V)	Star Wars (with tractor beams)
14	destructive RNA brain memory extraction, empathy & stress detectors, gill implants	densitometers, bonded superdense, direct neural interface (DNI), portable fusion gun, molecular computing, 3D printers	ICE's Cyberspace, Neuromancer (with AI)
15	true robot body (cybershells), replicants (bioroids), true sapient AI	neural scanners, bioscanners, grav attractors (tractor beams)	
16	brain tapes (memory uploading), parahuman genetics	nano-fabrication, quantum computing	GURPS Transhuman Space
17	robot antibodies (nanites), uplifted animals	antimatter powerplant	
18		disintegrators, matter transporters, energy forcefields	Star Trek, The Culture
